

Your website is your brand's /business's home. The place where your clients will visit to gather information and credibility about who and what you've done! Because of that, we've created a process for web design to ensure your long-term success. We see a lot of competitors who ask a handful of questions before disappearing for a period of time, returning with a web design and an invoice. We prefer to take a more collaborative approach that keeps you involved at every stage.

HERE'S HOW WE ILLUMINATE YOUR IDEAS

- **DETERMINE:** We know your website should communicate both who you are, what you do and how someone can connect with you. . It should speak to your audience on a subconscious level and make a positive impression upon them. We begin every web design project with a client discovery session, during which we will **DETERMINE** the tangible and intangible things that make your company and team illuminate!
- **DESIGN:** Our creative designers will take the information from our discovery session and begin to **DESIGN** some options using 100% of their creative ingenuity. Once the website mock is completed, we'll present it to you based on the information you've given us. You'll have the opportunity to review and provide feedback for revisions.
- **DELIVER:** Once you're satisfied with the web design, we'll launch your site and **DELIVER** to you all the information.

THE BENEFITS OF ILLUMINATING YOUR IDEAS WITH US

- We will keep you involved at every step of the process. This improves results and makes the entire web design project progress faster.
- Your web design will be entirely original and crafted by an experienced & creative web designer.
- Your web design will be more than a flashy graphic- it will be a powerful visual manifestation of your brand's identity.
- Our staff will communicate with you in a prompt, professional manner throughout the project.

WHEN YOU ARE READY TO ILLUMINATE

The client can take the following steps to proceed with this project:

1. Choose the best website proposal that fits your brand needs and email our team with your chosen project.
2. Our admin team will then, send over your initial invoice for payment.
3. Once your payment has been submitted, we'll kick off with a preliminary Illumination Loading email detailing your steps to moving forward.

***All potential clients are given 7 days to accept the proposal before it expires.*

Website Design & Development Proposal
